

1 (August 7, 2006)

2 The first paragraph of Section 1-08.5 is revised to read:

3

4 The Contractor shall complete all physical contract work within the number of “working
5 days” stated in the Contract Provisions or as extended by the Engineer in accordance
6 with Section 1-08.8. Every day will be counted as a “working day” unless it is a
7 nonworking day or an Engineer determined unworkable day. A nonworking day is
8 defined as a Saturday, a Sunday, a whole or half day on which the contract specifically
9 prohibits work on the critical path of the Contractor’s approved progress schedule, or
10 one of these holidays: January 1, the third Monday of January, the third Monday of
11 February, Memorial Day, July 4, Labor Day, November 11, Thanksgiving Day, the day
12 after Thanksgiving, and Christmas Day. When any of these holidays fall on a Sunday,
13 the following Monday shall be counted a nonworking day. When the holiday falls on a
14 Saturday, the preceding Friday shall be counted a nonworking day. The days between
15 December 25 and January 1 will be classified as nonworking days.
